Josh,

GSENM maintains a special collection with Southern Utah University. Much of the materials in the research paper list can be found there. You can view documents directly from the page. Here are 2 links into the collection, the top one is the actual list of reports (not sure if would work to copy it), the bottom requires that you click on the Ms.130 link found on the webpage.

<http://archive.li.suu.edu/archive/search?s=379630501&t=d>

<http://archive.li.suu.edu/archive/index.jsp?d=Ms.130>

See if this meets your needs.

Thanks!

It sounds like the library is not going to be much help, but it looks like a number of the documents in the spreadsheet are reports that were developed or submitted to GSENM. Would it be possible to pull as many of those as you can? I excerpted that list below. Hopefully you have most of these in your files.

Depends on what you'd like, I have all the WSA EIS documents scanned and in OCR. This seems to be largely where items were pulled from in the Secretary's Memo to BLM--the list objects in Memo where recreated in the GSENM List of Historic and Scientific Objects(Excel). Most of the items in list GSENM Publication table are in a digital format maintained by Southern Utah University. The actual Bibliography in the Memo is partially listed GSENM publications list and you can sort under the column "DOI Sec. Memo 1996" for those occurrences.

When you a get chance let's discuss what would be most useful to you.
